

# FLAT

by panconnect.

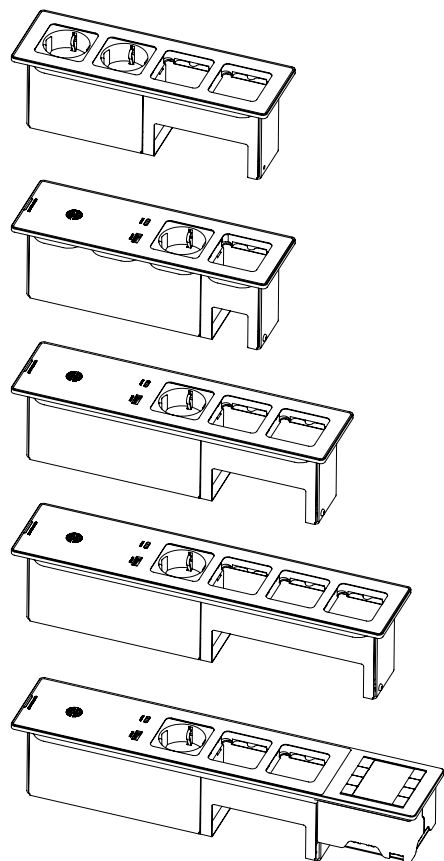

**FLAT** is a basic but very universal panel that can be placed on working places, conference tables, and in conference rooms. This product can be used practically everywhere where universal connectivity is needed. When there is a requirement for maximum modularity, low installation depth and easy installation, FLAT is the right choice. PANCONNECT offers 5 sizes of this product.

**FLAT LITE** contains only sockets or combination of sockets and connector modules (alternatively PULL-OUT cables). Three other sizes - **FLAT M**, **L** and **XL** can be used depending

on the connectivity requirements and number of sockets that are needed.

All the panels include **USB - A and USB - C (60W)** charging slots, alternatively Qi charging that is integrated directly in the panel.

**FLAT PLUS** includes on top of that third party's active module (for size from 45 to 55 mm), typically a control compact system.
